

Fire Safety LADDERS

What are Fire Safety Ladders?

Fire safety ladders are specially designed compact ladders that offer an additional means of escape from a two story home in the event of a fire. These easy to use ladders are designed to fit under a bed or near a window for quick deployment if needed.

Why Should I Have One in My Home?

The most important thing to remember during a fire is to get everyone out of the structure. Every two and a half hours someone dies in a house fire.* Fire safety ladders provide an additional escape route during a fire, especially if a fire blocks a second story stairwell.

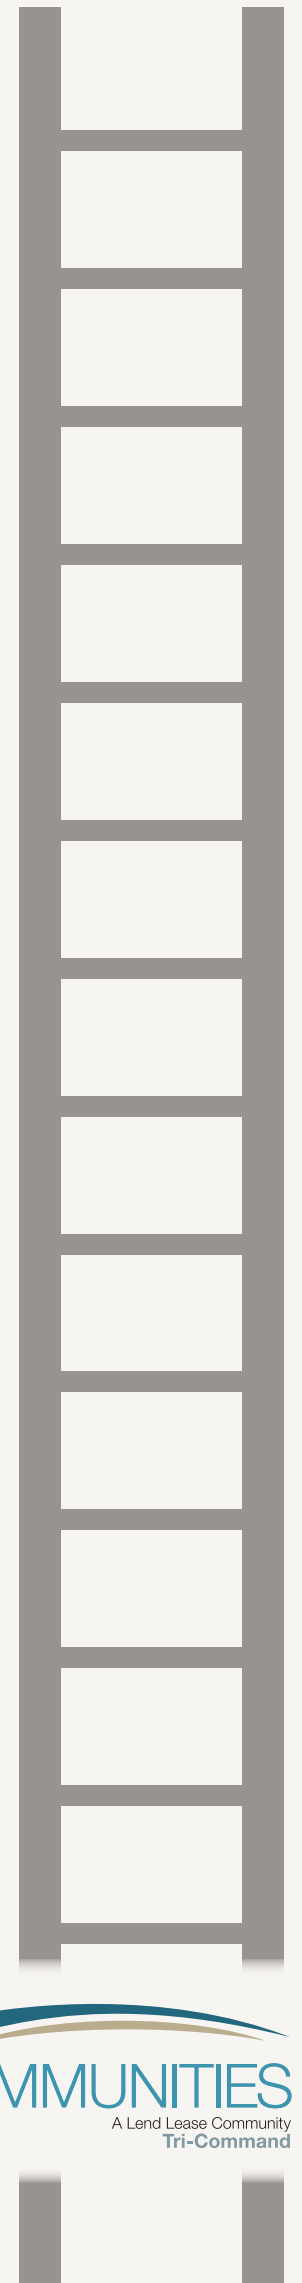

Am I Required to Have One?

There is no requirement that you must have a fire safety ladder in your home. However, it is highly recommended that you have at least one fire safety ladder in your home if you live in a multi-story home. A fire safety ladder is crucial part of a fire escape plan.

Where Can I Purchase One?

For your convenience, **AMCC at Tri-Command is currently offering Kidde Two story Fire Safety Ladders for only \$42** (sold at cost) at each Community Management Office. To purchase a ladder, please see any AMCC Community Management staff member. Ladders can be purchased by personal check and will be delivered to your door. If you would prefer to purchase a ladder elsewhere, similar ladders are often available at your favorite home improvement store.
